SwissBorg

SwissBorg is a team of fintech experts and engineers aiming to create a community-centric financial ecosystem. After raising $52 million from 24k individual contributors at its ICO in 2018, the Swiss fintech is building institutional-grade products that are fast, scalable and secure. Our ultimate goal is to make crypto wealth management accessible, fair and fun for everyone.

CHSB TOKEN

The Heart of the SwissBorg's Ecosystem

SwissBorg community members can participate and invest in SwissBorg using our CHSB multi-utility token (ERC20). You can purchase CHSB tokens and become a community member to benefit from the following advantages:

Staking
Become a premium user and pay 0% commission for Bitcoin and CHSB.

Buy Back and Burn
Benefit from a decrease in token supply via our Buy Back & Burn policy.

Voting Rights
Participate in the future of SwissBorg by voting in our referendums.

Meritocracy
Earn rewards for contributing to the SwissBorg ecosystem.

OUR COMMUNITY

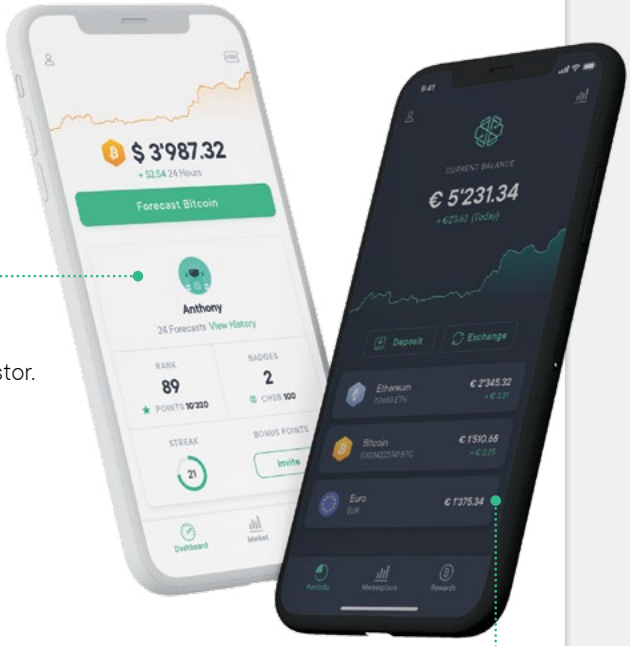

SwissBorg DAO
The SwissBorg DAO (decentralised autonomous organization) is a work-sharing platform where we reward the engaged members of our community in return for specific contributions.

Cryptonites TV
A Youtube channel entirely built with and for the community hoping to entertain, educate and grow our community. The show boasted several viral episodes with the most influential figures of the cryptosphere. Notable guests include Andreas Antonopoulos, Bobby Lee & Don Tapscott.

Cryptonites Tribe
With 8K members and 10 meetup groups, Cryptonites Tribe is a series of quality monthly meetups and conferences educating and spreading the blockchain gospel!

OUR PRODUCTS

A New Era of Crypto Investment

Community App

An educational game enabling you to become an expert investor. Predict, learn & earn Bitcoin without spending a penny.

Community App Players:
85,000+

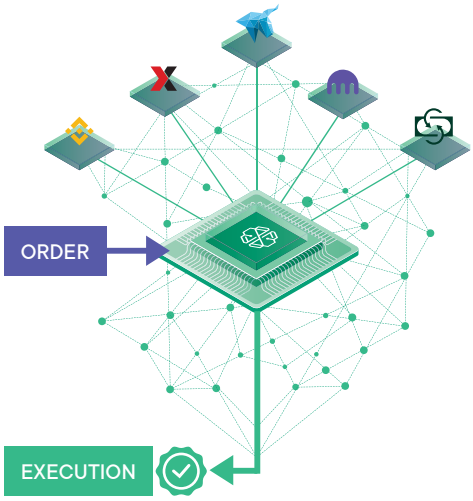

Forecasts Made:
1 Million+

Wealth App

Crypto wealth management app where users can buy, sell and exchange digital assets using multiple fiat currencies. Powered by its Smart Engine, we offer **maximum liquidity**, **low fees** and the **best execution prices** while **creating new trading pairs** that do not exist in the market as of today.

Smart Engine

Swissborg's Smart engine is the first multi-node and multi-route OEMS that calculates all the execution combinations in real-time.

We partnered with a top tier software development specialist in the UK that has built FX and commodity trading systems for Tier 1 banks such as Deutsche Bank.

Other OEMS systems are unable to benefit from the nature of the crypto market where assets trade vs each other and in different currencies across various exchanges.

Our OEMS is able to calculate all possible routes, taking into account fees, order-book liquidity, minimum amounts, lots sizes and other parameters to achieve Best Execution.
